

## EMPOWERING MANUFACTURING NETWORKS & WORKFORCE PROGRAMS WITH SCALABLE, BRANDED PORTALS

*Vessel's platform is built for organizations serving manufacturers, workforce programs, and local economies. Our architecture enables secure, scalable, and personalized delivery—without extra complexity.*

*At the core: multi-tenant, branded design.*

### What It Means

Multi-Tenant: One platform, many secure environments ("tenants")—each managed independently, all under one roof.

Branded: Each tenant reflects your identity—logo, domain, tone, and content.

### Why It Matters (Even with One Tenant)

Even if you're using a single portal today, Vessel is built to grow with you. As programs expand, new clients emerge, or partnerships form, your system scales instantly.

### Built for Growth

- Add portals for new programs or regions
- Segment users and content easily
- Manage everything from one login

### No Duplicated Work

- Customize content and dashboards per portal
- Control access and permissions centrally

### Future-Ready

Launch new initiatives or collaborate with partners—no rebuild required.

### Use Cases

- Regional Expansion – New portals for local districts, each with their own content.
- Partner Collaboration – Branded access for boards, MEPs, or chambers.
- Initiative Launch – Standalone grant-funded programs, fully segmented.

### Personalize delivery

### Support multiple programs securely

### Centralize insights
